SUMMARY

Adv Comp-Sci (Hons) student at Curtin with experience developing AI, RAG-based, and data-driven applications using Python, Flutter, SQLite, LangChain, FAISS, and OpenAI models. Strong foundation in software engineering, algorithms and databases, with project experience in mobility data generation and AI healthcare support.

EDUCATION

Curtin University | Bachelor of Advanced Computer Science Honours | 79 CWA Feb 2024 - Ongoing

- Coursework: Database Systems, Computer Networks, Data structures and Algorithms, Machine Learning, Operating Systems
- Letter of Commendation (2025) for Attaining a score of above 80

Willetton Senior High School | High School Diploma | 96 ATAR

2018 – 2023

- Course Work: English, Methods, Chemistry, Human Biology, Physics

PROJECTS

GenAI for Controlled Human Mobility Data Generation

Feb 2026 – On going

- Built a Python-based GenAI pipeline to generate controlled synthetic human mobility trajectories from real mobility datasets.
 - Implemented RAG-based retrieval using FAISS, embeddings, and OpenAI models, then evaluated outputs with DTW, cosine similarity, and visual comparisons.

AI Virtual Health Assistant for CALD Healthcare Support

Feb 2025 – Oct 2025

- Developed a cross-platform AI health assistant using Flutter and SQLite to support culturally and linguistically diverse healthcare users
- Built LangChain, FAISS, and RAG-based document retrieval features, improving reliability through prompt engineering, safety filters, and human review.

WORK EXPERIENCE

Seafood Processor | KB Seafood

Oct 2024 – On going

- Processed crayfish products to strict food safety and SOP standards while operating specialised machinery in a high-volume production environment
- Managed warehouse operations including palletising, truck unloading, cold storage handling, and outbound dispatch to ensure accurate, on-time delivery
- Used WMS for inventory tracking and order fulfilment, maintaining high accuracy and meeting daily production and shipping targets

Volunteer Store Helper | Save the Children - Op Shop

July 2025 – Present

- Assisted customers in-store, processed transactions and maintained high standards of service
- Supported store operations including stock receiving, pricing, replenishment, and housekeeping

Volunteer Helper | Local Community Events |

2019 – 2021

- Helped with event organization, crowd control, and logistics
- Operated audio systems for effective sound management
- Helped with setup, cleanup, and general event area maintenance

TECHNICAL SKILLS:

- **Programming Languages:** Java, Python, SQL, C
- **Tools:** Flask, REST APIs, SQLite, NumPy, Pandas, RAG, LangChain, FAISS, Pytorch, HTML, CSS, Git, VIM

INTEREST & LANGUAGES

- Coding, Calisthenics & Gym, Learning Languages, Hiking & Running
 - English (Native), Urdu (Native), French (Beginner), Arabic (Beginner)
-
